Dear Mr. Pappas:

We are in the midst of reviewing the Plan of Operations (Plan) you submitted to this office on May 12, 2000. Within that Plan, you propose a new 3000 foot long road. You did not include in your plan a map designating the route of said road.

Regardless of the course of the proposed road, we are having difficulty understanding the need for it at this time. Present roads can be used to access within a few hundred feet of the proposed mine site. It is our opinion that a new 3000 foot road would constitute unnecessary and undue degradation. Since we do not know the route of the proposed road and thus cannot analyze the impacts of building it, we will not do so, unless, within 10 days of receipt of this letter, you provide a map and an explanation why the road is necessary. We will then consider the proposal in the Environmental Assessment as an alternative to using existing roads.

Another proposal in your plan is the statement: "Water, from an existing spring approximately two miles southeast of the quarry, will be used to help part the thin bedded stone and also to roughly clean the selected material." We are willing to sell a nominal amount of water for your operation, but not enough to wash the material. Please make alternate plans to clean the stone.

RECEIVED

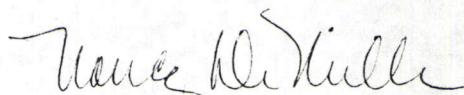

MAY 25 2000

DIVISION OF
OIL, GAS AND MINING

We anticipate completing the Environmental Assessment by June 2, 2000, sooner, if you provide the above mentioned map in a timely manner.

If you have any questions, please feel free to contact Sheri Wysong at (435)743-3124.

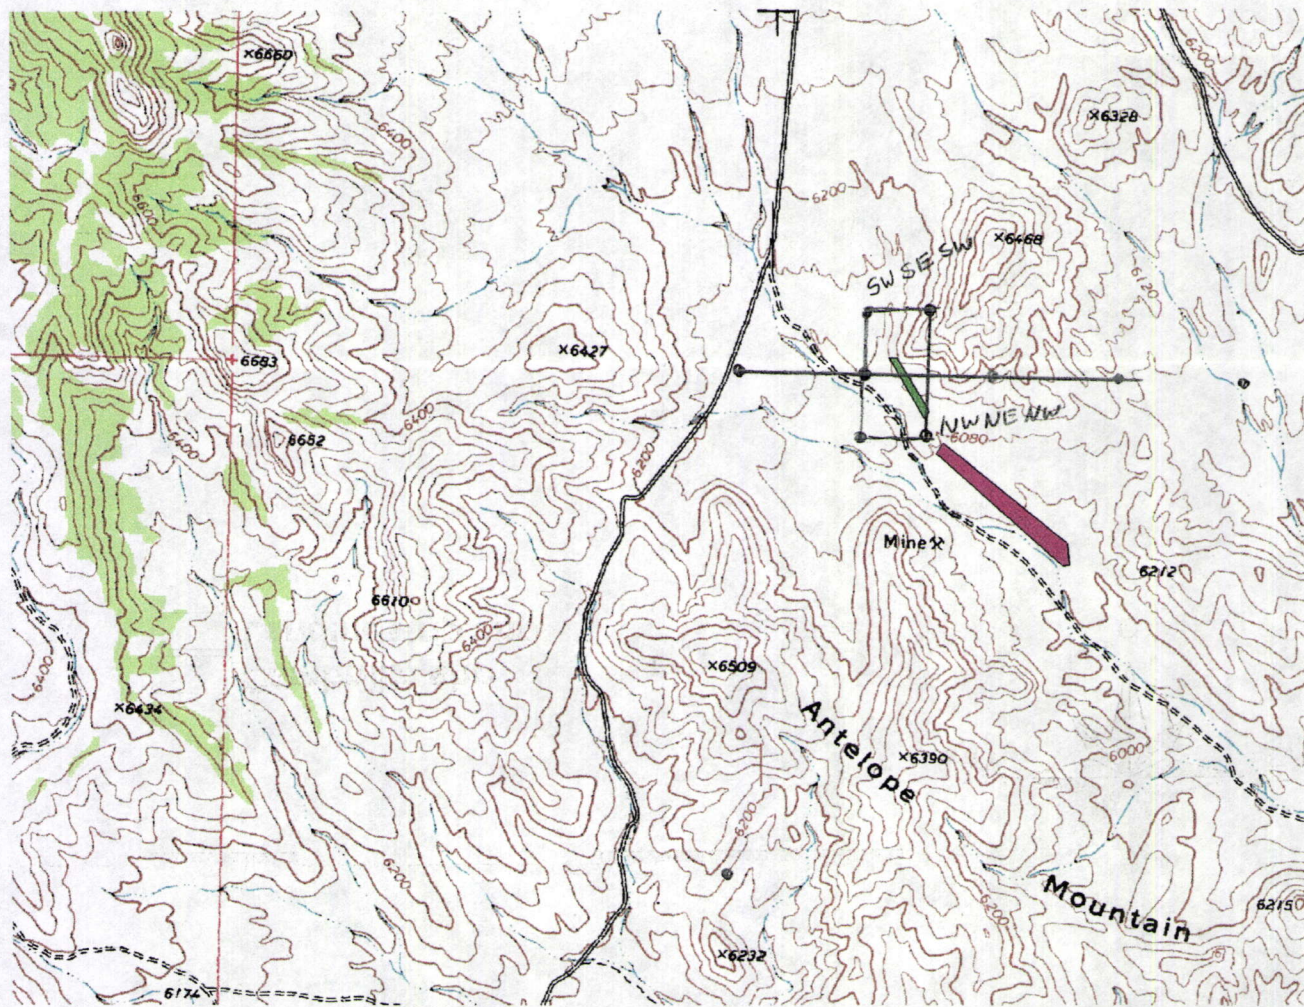

Sincerely,

A handwritten signature in dark ink, appearing to read "Rex Rowley". The signature is fluid and cursive, with a large initial "R" and a stylized "W".
